Report No E2 Pr 87 dated 11-11-1946 from the Municipal Engineer, Bangalore City Municipality

---

The permanent executive establishment of the Municipal Engineering section consists of the following staff and they have been entrusted with the work as detailed therein There are two Surveyors and ten Suboverseers in this establishment

The City of Bangalore has been divided into two Ranges and has been further divided into nine divisions The two Surveyors are placed in charge of the two Ranges, North and South, who are supervising the works in their Ranges and one Suboverseer is placed in charge of each division The Suboverseers are attending to the repairs and maintenance of roads, drains footpaths and other miscellaneous works and supervision of public works done by the contractors Since the 3rd Division is a very big division and it is very difficult to supervise the works by one Suboverseer, it has been divided into two subdivisions as 3rd A and 3rd B and two suboverseers are placed incharge of the divisions Altogether ten suboverseers are posted for the ten divisions

Major City Improvement Works such as cement concreting the roads, paving the footpaths, constructing public baths and urinals, construction of platform near Sriramapuram Labour Colony for housing the labourers, have been proposed to be taken up departmentally this year, as such constant supervision of the works by the subordinates is necessary for efficient and quick work In addition to these works, some of the most important and major building works such as construction of first floor to City Market (2) construction of Students' Lodge (3) construction of stalls for Scrape Iron merchants in Old Bus Stand (4) construction of Slaughter House and (5) construction of vegetable Market in Visveswarapuram, have also been proposed to be taken up this year A sum of Rs 3,89,300 for Major City Improvement Works, Rs 3,22,000 for Major Building Works and Rs 1800 towards the establishment charges have been provided in the current year's budget These works cannot be managed by the existing staff as they have been

over burdened as already explained. The three Suboverseers proposed now are very necessary for supervision and early execution of these important works. The establishment may be sanctioned for one year in the first instance. Four Calendar months have been elapsed already and there are only eight months more in the official year The provision of Rs.1,200/- made for the establishment charges of these six Suboverseers will be sufficient

The revision of present establishment of the Suboverseers has not been proposed The establishment now proposed is purely a temporary one for attending exclusively the Major City Improvement Works As such, the proposition statement is prepared and submitted only for the three Suboverseers, which may kindly be forwarded to the Government for sanction.
